

What goes beep, beep, beep, beep

and can keep your house safe from carbon monoxide?

Circle the picture of the item that makes this sound and have fun coloring the rest.

Digger Dog and Dottie know that carbon monoxide (CO) is a dangerous gas that can't be seen or smelled. It's important to have carbon monoxide alarms on every floor of your home.

REMAND YOUR PARENTS to review your CO alarm's model specifications and be sure to learn the warning noises it makes. And remember, if your CO alarm goes off **stop** what you're doing, **leave** your home immediately and **call 9-1-1**.
